## Product Features

### Material features

Sefar offers a wide range of filtration media and highly industrialized fabrication capabilities.

Inherent to our synthetic materials are:

- Good fatigue properties compared to metal mesh
- Easy to handle and no sharp edges
- High strength and tear resistance
- Non-shedding properties

Open mesh fabric

Closed mesh fabric

Depth filter material

- High precision and reliable mesh opening
  - Low pressure drop
  - Various surface modifications available
  - High performance polymers for extreme and harsh conditions
- Highly efficient particle retention
  - High throughput
  - Excellent surface properties
- Highly efficient particle retention
  - Low pressure drop
  - Resistant to corrosion caused by fuels and blends
  - Maximized filtration area
  - State-of-the-art bonding technology

### Fabrication & Converting Solutions

Information on our fabrication capabilities can be found by following the links below:

#### ■ Customer specific

For further information please call us, we will also gladly send you fabric samples!
