

SEFAR PCF

The pre-coated screen printing mesh – expose, develop, dry – print.
 At last, standards that have long been in place for offset and flexographic printing are now available to professional screen printers: precise, standardized, industrially produced high-tech stencils ensure consistent, high quality prints.

Mesh Features

SEFAR PCF, ready-made print forms in constant top quality. SEFAR PCF is the innovative, unique pre-coated screen printing mesh for industrial screen printing and ensures superior print quality and efficiency. This innovative screen printing breakthrough is clean, space saving and environmental friendly.

- Elimination of preparation steps in combination with maximum process reliability and coating quality
- Unsurpassed UV-light undercutting protection
- Standard range
- Environmental friendly

Your Benefits

Screen / stencil maker benefit

- Eliminates the purchase of emulsion and complex coating processes
- Reduced handling of the screens
- Optimal stencil quality with minimum effort
- The tension drop is low and balanced
- Broad exposure latitude
- Very precise image transfer
- Optimization of storage management
- High reliability ensures continuous production
- No storage of emulsions
- Reduced use of chemicals in the stencilmaking process

Printer benefit

- Print on demand
- Most accurate reproduction
- Longest stencil life
- Elimination of cleaning, stripping and ghost imaging removal
- High reproducibility of the stencil
- Best edge definition in print
- Ensured continuous delivery of stencils
- No surprises in press
- Reduction of the cleaning cycles
- Reduced storage of chemicals
- Increased operational safety

Applications

- Plastic containers
- Labels

Expand your options with SEFAR PCF for screen printing on plastic containers, labels, glass ware, optical discs and many other challenging print substrates.
